CCSI Achieves AICPA SOC 2 Type II Certification

Bohemia, NY, May 8 , 2018 – Contemporary Computer Services Inc. (CCSI), a leading provider of technology services and solutions, announces that it has received the AICPA SOC 2 Type II certification.

This third party standard and process confirms the focus and strong commitment CCSI has on protecting our clients, our services, and our clients' data. The report validates that CCSI NOC, SOC, and infrastructure has been tested for security, integrity, availability, and confidentiality.

The SOC 2 Type II examination was performed by MCM CPAs and Advisors (MCM). Criteria utilized was those from Trust Services Principles (TSP) section 100A (2016) and technical practice aids issued by the AICPA and the Canadian Institute of Chartered Accountants. TSP's are the industry standard for security principles for businesses operating as third party service organization.

"CCSI is dedicated to its customers and providing high quality services. Our customers are concerned about their data security, which in return makes us be hyper concerned," said John R. Riconda, President/CEO of CCSI. "Achieving SOC 2 Type II certification demonstrates CCSI's dedication and commitment to ensuring the security and confidentiality of our services and customer's critical data."

The examination confirms CCSI's commitment to the most rigorous security, integrity, availability, confidentiality, and processing integrity standards and procedures in the industry. From this audit, CCSI customers can be assured and continue to rely on CCSI's services and controls.

About CCSI

For more than 40 years, CCSI has remained on the forefront of technological innovation, navigating clients through a complete IT evolution with a focus on helping firms understand the practical business implications of emerging technologies. CCSI provides the highest quality of service in the industry for the full spectrum of technologies–from containers to PCs, network infrastructures, managed services, IP telephony, cybersecurity, cloud services, SDWAN, to storage solutions.
